

Breezy Enterprise Edition

Any Device. Any Printer. Anywhere. Anytime.

The business world has gone mobile. That's no longer a prediction, but a present reality. Breezy was designed and built to solve to a consistently frustrating problem:

How can I securely print from my mobile device whether in the office, at home or on the road?

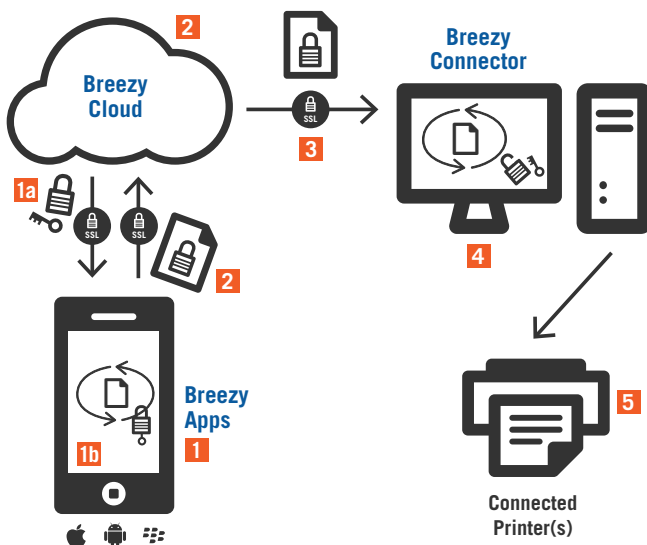

Whether your employees are spread across three floors, three buildings, or three continents, you will find Breezy to be cost-effective, flexible and easy to use.

Liberate your workforce and modernize your existing print infrastructure by going mobile with Breezy!

The Secure Solution

- Breezy maintains AICPA SOC 2 security certification.
- The only solution offering military grade, on-device file encryption.
- Encrypted files are transferred securely to the printer of your choice.
- Robust tools enable detailed reporting of who printed what, when and where.
- Integrated with leading mobile security solutions from Good, MobileIron, Mocana, Aruba and more.

How Breezy Works

- 1) The user selects the document to print and the printer to use.
- 1a) The device obtains the appropriate public key from Breezy's secure cloud infrastructure.
- 1b) The device encrypts the document using the public key obtained in step 1a.
- 2) Breezy App submits encrypted document via HTTPS to the Breezy Cloud.

- 3) The Breezy Connector detects the existence of the pending document and downloads it from the cloud.
- 4) The Connector decrypts the document using its own private key.
- 5) The Connector sends the document to the user's chosen printer.

Secure mobile printing
that just works.

Features

Why you should consider the Breezy Solution:

Secure

- Breezy is AICPA SOC 2 Type I audited and certified secure.
- The only solution to encrypt on-device before securely transferring documents via our proven infrastructure to the printer of your choice.
- Robust tracking tools report who printed what, when and where.
- Integrated with leading mobile security solutions.

Mobile

- Breezy Beacon enables Apple AirPrint for iOS devices across enterprise subnets. No hardware to purchase or app to install.
- BYOD capable with native apps for iOS, Android and Blackberry.
- Use GPS to locate the nearest Breezy Partner Network print location.

Flexible

- Print to internal corporate printers without a Wi-Fi connection.
- Integrated with leading productivity tools like Box, TouchDown and more.
- Printer agnostic – connect all your enterprise printers globally, regardless of printer manufacturer.
- Powerful API adds printing to in-house apps at no extra charge.

Easy to Use

- Centralized IT management through a simple, web-based dashboard.
- SSO integration via MDMs and identity federation providers.
- Complete IT control over Breezy app functionality.

True Mobility

In the office, at home or on the road, Breezy lets you print securely whenever and wherever you need to.
