

# The Universal Queue

Only from Breezy

## Secure, Driverless Printing for all Printers

The Breezy Universal Queue is a revolutionary new way to provide your users with secure, driverless access to every printer in your fleet. Unlike traditional “pull-printing” systems that require expensive hardware and only support certain models, the Breezy Universal Queue is a software-only solution that works with every printer ever made.

Using an innovative, patent-pending method based on QR Code scanning via the user's mobile device, the Universal Queue allows you to provide “pull-printing” (also known as follow-me printing or secure release) to all of your users without requiring any new hardware — making your users happier while saving you money.

### The Breezy Universal Queue is:

#### Secure

- Encrypts all print jobs, both in transit and at rest, ensuring that your confidential data stays secure.
- Enables regulatory compliance by ensuring that only the right people can release the document at the printer.
- Includes detailed auditing tools including reports on who printed what, when, and where.

#### Vendor-Agnostic

- Works with every printer ever made. No need to worry about whether Bob in Accounting will be able to use his favorite printer: he will.
- Integrates with many cost-accounting and enterprise print solutions.
- Enables global deployments by providing a uniform solution to all your offices — regardless of local vendor choices.

#### Cost-Effective

- Costs far less than competing solutions, due to innovative hardware-free design.
- Prevents waste, eliminating “forgotten” print jobs’ impact on your bottom line.
- Eases strain on IT staff by removing the need to support printer drivers, freeing up your team to focus on other tasks and improving your bottom line.

#### Guest Printing

- With native apps for iOS and Android, a virtual printer driver for Windows and Citrix users, and web and email-based options for others, the UQueue supports all of your users - even guests.
- Flexible architecture lets you enable secure guest access to all your network printers without granting network access. Even works on 3G or 4G connections!

Breezy is the world's leading platform for secure mobile printing. Founded in 2009, we serve customers from the Fortune 500 to non-profit organizations, schools and governmental agencies around the world. Our award-winning software has been deployed in dozens of countries for hundreds of thousands of users.

With a simple label like the one above, you can use the Universal Queue to transform your existing print fleet from an aging liability into a dynamic, newly-useful asset. Pairing a label takes less than 45 seconds, and makes the new printer instantly available to mobile users.

# Eliminate printer drivers

## Say goodbye to the worst part of your job

Dealing with printers and printer drivers is the #1 complaint of IT staff everywhere. Either the user doesn't have the right driver, or they can't find the printer on the network, or they are just visiting from another office and don't have the right queues installed, or they're connected via wifi and can't see any printers at all, or something else is wrong.

(And something else, it seems, is always wrong.)

Good news: the Breezy Universal Queue, or UQueue® for short, ends your printer battles forever. With a drop-dead-simple end user interface, users can print via a virtual driver, our award-winning mobile apps, a web portal or even by simply emailing the UQueue at any address you choose, like [print@yourcompany.com](mailto:print@yourcompany.com).

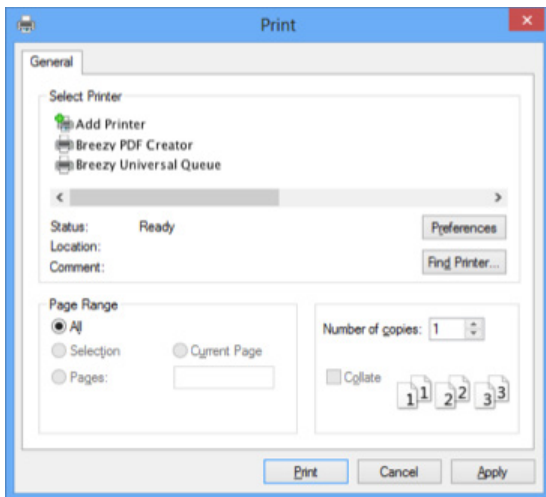

## Good for your users

Ask any of your users: printing is a hassle. By eliminating drivers and connectivity struggles, the Universal Queue gives simple, seamless printing to every user - even guests!

## Great for you

Studies show that between 35% and 60% of all IT helpdesk calls relate to printing. The Universal Queue frees you staff from driver management, allowing them to serve more users, more efficiently.

## Familiar, Native User Experience

## Easy to Administer

- Works hand-in-hand with your existing Breezy infrastructure to enable pull-printing for any printer in your fleet.
- Onboarding new printers takes less than 45 seconds with our simple, mobile-friendly admin tool.
- With no hardware to configure or connect, you can set up your whole system in a single afternoon - no consultants required.
- To learn more about the Universal Queue or to schedule a personal demo, visit our website or email [sales@breezy.com](mailto:sales@breezy.com).
