

# Breezy Enterprise Edition

Breezy for AirWatch®

## Secure mobile printing for AirWatch

Breezy for AirWatch gives customers the flexibility and end-to-end security they need to cover users, devices, applications, content, data, email and networks – from wherever the user is accessing company data.

AirWatch creates a secure environment on mobile to keep data secure and Breezy helps complete this data secure during the critical “last mile” to the journey from digital to print. Breezy liberates your workforce by giving them the easy and secure choice of connecting to their existing print infrastructure.

### Breezy for AirWatch is:

#### Secure

- Encrypts files on the device before transferring via secure channels to the intended printer.
- Enables regulatory compliance by keeping encrypted content secure while at rest or in transit from initial file to final print release.
- Includes robust detailed auditing tools including reports on who printed what, when, and where.

#### Scalable

- Connects all your enterprise printers globally, regardless of type or manufacturer.
- Gives your users access to the Breezy Partner Network – a global network of thousands of hotels, airports, and print service providers – to find secure print locations via GPS while on the go.

#### Flexible

- Supports BYOD by delivering native apps for iOS and Android, while ensuring data is secured and contained by AirWatch.
- Integrates with most cost-accounting and secure release solutions.
- Powers the addition of a print button to internal apps.

#### Easy to Use

- Authorizes the user credentials by using AirWatch's SSO capabilities.
- Enables a user to easily find their favorite printers and print with a few clicks.

The world's leading secure mobile print and fax platform. Whether roaming the halls of your office or traveling the world for work, print or fax securely when and where you need.

AirWatch is the world's largest mobile security and enterprise mobility management provider with more than 1,500 employees across nine global offices.

# Secure AirWatch Integration

## Getting started with Breezy is easy

Breezy's enterprise connector sits on corporate print servers, making it simple to deploy and easy to use. Breezy for AirWatch can be up and running in minutes and requires no additional hardware or driver installations. It offers the most secure solution in the market by encrypting each document on the device and single sign-on (SSO) with AirWatch integration gives users a familiar experience. Through a web dashboard, administrator can benefit from centralized IT management with full administrative control and visibility.

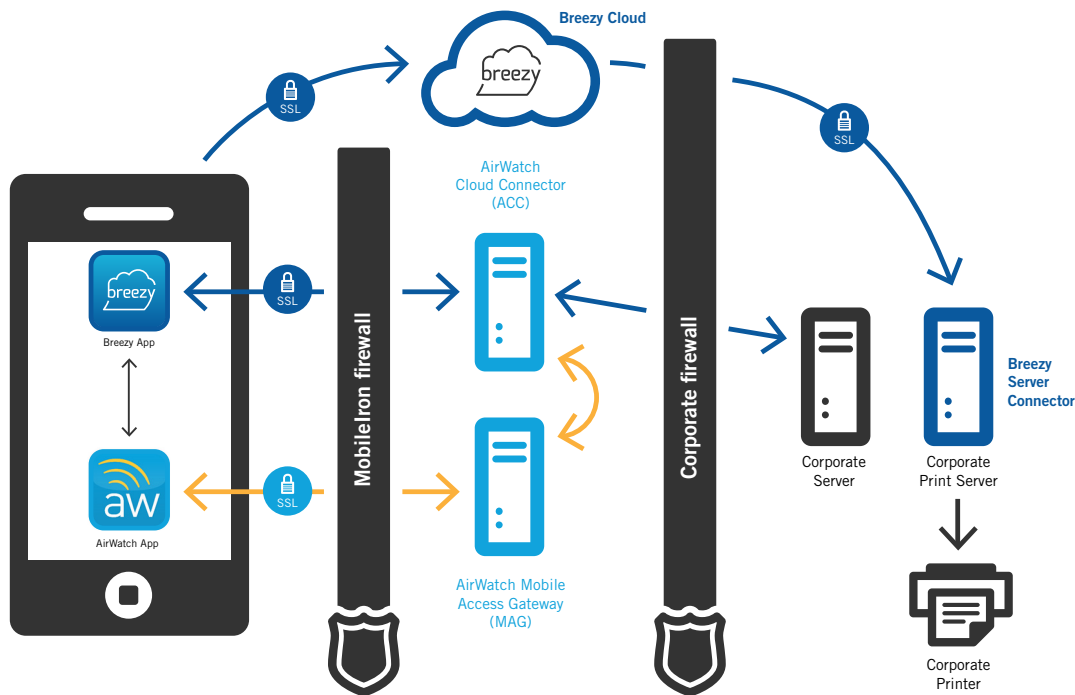

## True Mobility

Whether roaming the halls of your office or traveling the world for work, Breezy ensures you can securely print or fax when and where you need to.

## Breezy Partner Network

A global network of thousands of hotels, airports and print service providers that enables users to print securely when on the go.

## AirWatch MDM Integrated with Breezy Enterprise Architecture

## AirWatch Integrated:

- On opening, Breezy for AirWatch app switches over to the AirWatch Agent on your secured mobile device.
- Enter your Passcode to authenticate, or watch as Breezy authenticates automatically with AirWatch and switches back to Breezy with the logged in user.
- Securely access and print approved data from your device.
- To learn more detail about how Breezy Enterprise Edition works visit our website at: <http://www.breezy.com/products/secure-mobile-printing-for-enterprise.html>

\*This is made for a typical virtual architecture and your choice of deployment may vary. Please check with your Breezy representative for more information.
