

# Breezy Enterprise Edition

MobileIron® AppConnect Enabled

## Secure Mobile Print For The Workforce

In today's business environment mobile devices abound and whether your company is spread across 3 floors, 3 buildings or 3 continents your workforce is already harnessing these tools as a way to increase collaboration and productivity while on the move.

The business world has gone mobile and Breezy integrated with MobileIron AppConnect ensures that your employees can securely access and print the critical business information they need to drive success. So liberate your workforce and your existing print infrastructure by going mobile with Breezy and MobileIron.

### AppConnect Integrated

Breezy integrated with MobileIron AppConnect ensures employees have access to the world's leading secure mobile printing platform while IT has the policy controls it needs. Together MobileIron and Breezy assure data-at-rest and data-in-motion is secure while permitting employees to print when and where they need using their mobile devices.

Breezy auto-detects MobileIron on the mobile device enabling the user to simply login to Breezy using their MobileIron passcode providing a seamless end-user experience.

### Secure

- **On-device Encryption** – Breezy is the only mobile print solution that encrypts files on the device before securely transferring the files to the intended printer.
- **DLP Policy Control** – IT can enforce MobileIron DLP, security and authorization policies while users can create, edit, share and print enterprise content accordingly.
- **Secure Data Removal** – If a user violates an app or device policy, the app, the container and all its data can be "selectively wiped" by MobileIT without erasing the entire device.
- **Audit Tools** – Detailed reporting shows who is printing what, when and where.

### Flexible

- **Printer Agnostic** – Mobile-enable your existing enterprise print infrastructure, regardless of printer manufacturer.
- **Multiple Networks** – Print utilizing cellular or Wi-Fi networks while on the road.
- **Collaboration** – Integration with leading productivity platforms such as Box and TouchDown.
- **Pull Print** – For additional security and cost control measures Breezy integrates with leading pull print authentication partners such as GoPrint and PaperCut.
- **Email Print** – Assign an email address to a printer and print via email submission.

Breezy

The world's leading secure mobile print and fax platform. Whether roaming the halls of your office or traveling the world for work, print or fax securely when and where you need.

MobileIron

Seamlessly integrates your mobile device with your company's mobile operations and authenticates MobileIron AppConnect secure applications.

Secure mobile printing  
and fax that just works.

# Secure MobileIron Integration

## Mobile

- **Breezy Beacon** – Enables Apple AirPrint for iOS devices across enterprise subnets. No hardware to purchase or app needed.
- **Fax** – Empower your workforce to send files as a fax from their mobile devices.
- **Breezy Partner Network** – Global access to thousands of hotels, airports and print service providers that enable users to print securely when on the go. Use GPS in the app to locate the nearest partner location.

## Easy to Use

- **IT Control** – Centralized IT management of the Breezy print ecosystem and Breezy app through a simple to use web dashboard.
- **App Functionality** – IT can determine which app functions are available to users and can turn on/off: Print at Home, Print at Work, Send Fax, etc.
- **Deep Integration** – As part of the MobileIron AppConnect ecosystem, the native app leverages the security capabilities and policy controls provided by MobileIron to ensure a secure and MobileIT controlled app environment without disrupting the end-user experience.

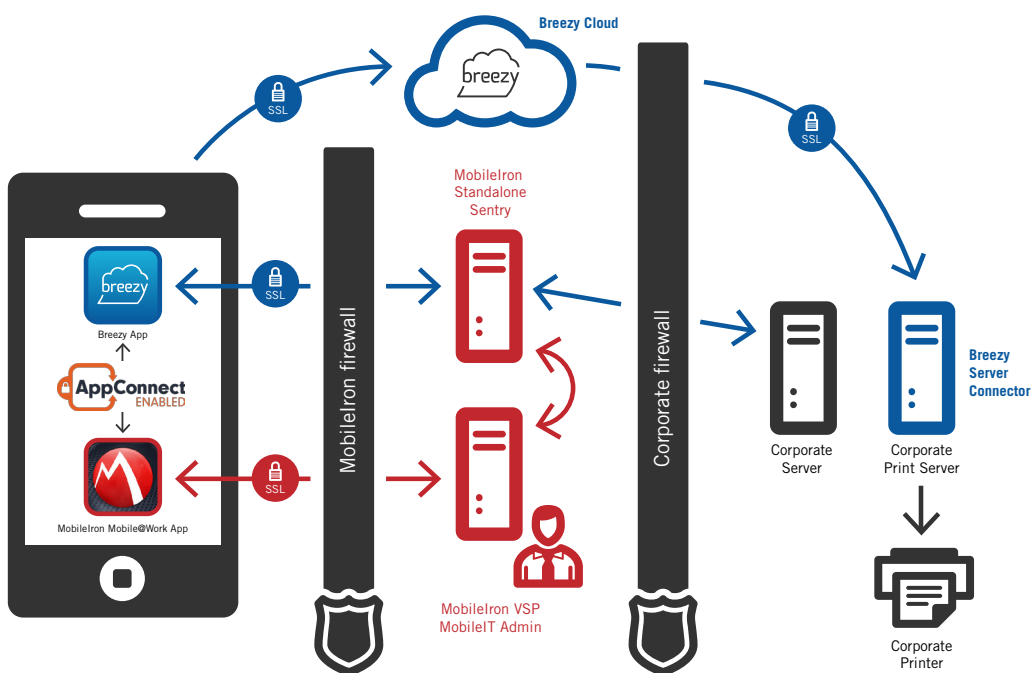

## True Mobility

Whether roaming the halls of your office or traveling the world for work, Breezy ensures you can securely print or fax when and where you need to.

## Breezy Partner Network

A global network of thousands of hotels, airports and print service providers that enables users to print securely when on the go.

## How The Integration Works

- Breezy App integrated with AppConnect auto-detects Mobile@Work on the device and enables the user a seamless single sign-on experience using their MobileIron passcode.
- The MobileIT Admin has central policy and DLP control over AppConnect Integrated Apps.
- Securely access and print approved data from your mobile device
